PROFILE

High-achieving Computer Engineering student at ENICarthage (Valedictorian in Languages) with a strong foundation in Software Architecture and Artificial Intelligence. Proven ability to solve complex problems through competitive programming (IEEE Xtreme) and hackathons. Seeking a final-year internship (PFE) in Germany to apply expertise in Full-Stack Development and Machine Learning within an innovative research or industrial environment.

EDUCATION

National Engineering School of Carthage (ENICarthage) Sept 2024 – Present
Engineering Degree in Computer Engineering

- Current Average:** 14.52/20 (Top 15% of cohort).
- Distinction:** Valedictorian (Major de Promotion) in French and English modules for two consecutive years.

Preparatory Institute for Engineering Studies of Monastir (IPEIM) Sept 2022 – June 2024
Preparatory Cycle in Physics and Chemistry (PC)

- Ranking:** 52/176 (1st Year), 49/196 (2nd Year).
- Outcome:** Admitted to National Engineering Schools via a national competition Contest (Rank 233).

TECHNICAL SKILLS

Programming Languages:	Python, Java, C/C++ , JavaScript, TypeScript, SQL
AI & Machine Learning:	TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV, Reinforcement Learning
Web Development:	Spring Boot, React, Angular, Node.js, REST APIs, HTML/CSS
Mobile Development:	Android (Java/Kotlin), NativeScript, XML
Databases:	MySQL, PostgreSQL, MongoDB
Tools & DevOps:	Git, GitHub, Docker, Figma, Linux, VS Code
Soft Skills:	Problem Solving (Competitive Programming), Team Leadership, Agile Methodology

KEY PROJECTS

E-Carthage Incident Management Platform 2025 –
Technologies: Spring Boot, Angular, MySQL, REST API

- Architected a full-stack web platform to streamline incident reporting and resolution for the university community.
- Designed a robust backend using Spring Boot with secure JWT authentication and role-based access control.
- Developed a responsive frontend with Angular, improving user engagement and reporting efficiency by 40%.

Smart Delivery Management System 2025 –
Technologies: Java, Spring Boot, Android, WebSocket, MySQL

- Engineered a real-time mobile application for tracking delivery status and optimizing routes.
- Implemented WebSocket protocols for live data synchronization between drivers and the central server.
- Designed a scalable microservice architecture to handle concurrent user requests efficiently.

AI-Driven Security Operations Dashboard (Ongoing) 2026 –
Technologies: Spring Boot, React, Python, Scikit-learn

- Architecting a centralized platform to orchestrate penetration testing workflows and visualize security metrics.
- Exploring Machine Learning models to detect anomalies in network traffic logs automatically.
- Focusing on secure coding practices and automated vulnerability scanning workflows.

Personal Portfolio Website 2025 –
Technologies: React, JavaScript, Vercel

- Designed and deployed a professional portfolio showcasing technical projects and certifications.
- Optimized for SEO and performance, achieving a 100/100 Lighthouse score.

PROFESSIONAL EXPERIENCE

Mobile Development Intern – MCM SOL, Sousse

Aug 2025 – 1 Month

- Contributed to the development of a pharmaceutical stock management mobile application.
- Collaborated with senior developers to integrate frontend interfaces (NativeScript/Angular) with backend services.
- Enhanced UI/UX design using Figma, ensuring accessibility and ease of use for medical staff.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

Hackathon Maratech (ESPRIT) – Team Leader

2025 –

- Led a team of 3 developers to build a full-stack charity management platform in 48 hours.
- Ensured compliance with IEEE accessibility standards, earning a Medal of Participation.
- Managed project timeline, task distribution, and final presentation under high pressure.

IEEE Student Branch – ENICarthage

2024 – Present

- Active member participating in technical workshops on AI and Embedded Systems.
- Participant in IEEE Xtreme 2024, solving algorithmic challenges in a global competitive programming event.

ENICarthage Annual Forum – Media Committee Member

2024 –

- Contributed to the organization of one of Tunisia’s largest student-led professional events.
- Managed media coverage and communication strategies, enhancing visibility for industry partners.

CERTIFICATIONS & LANGUAGES

Certifications

- Cisco CCNA 1: Introduction to Networks.
- React Certification: Coursera (Meta).
- FreeCodeCamp: Responsive Web Design Certification.
- IEEE Xtreme: Certificate of Participation (Global Competitive Programming).

Languages

Arabic: Native

English: B2 (onSET Certified)

French: C1

German: Beginner (A1.2 Self-Study)
