PROFILE

Computer Engineering student at the National Engineering School of Tunis (ENIT) with a strong focus on System Design, Artificial Intelligence, and Full-Stack Development. Passionate about building scalable, intelligent systems and solving complex algorithmic problems. Seeking a final-year internship (PFE) in Germany to apply expertise in Deep Learning, and Software Architecture within an innovative research.

EDUCATION

National Engineering School of Tunis (ENIT)

Engineering Degree in Computer Engineering

Sept 2024 – Present

Preparatory Institute for Engineering Studies of Monastir (IPEIM)

Preparatory Cycle in Physics and Chemistry (PC)

Sept 2022 – June 2024

- Ranked among the top students nationally, securing admission to ENIT via the national competitive concours exam.

Secondary Education

Baccalaureate in Mathematical Sciences

2022 –

- Grade: 14.78/20 (Honors: *Bien*)

TECHNICAL SKILLS

Full Stack Development:

Python (FAST API), JavaScript (React, Node.js, Express), TypeScript, PostgreSQL, MongoDB

AI & Machine Learning:

Deep Learning (TensorFlow, PyTorch), RAG Systems (LangChain), Agentic AI Workflows, NLP, Scikit-learn

System Architecture:

Microservices, Docker, Redis (Caching), REST APIs, WebSockets

Tools & DevOps:

Git, GitHub, CI/CD

Problem Solving:

LeetCode

KEY PROJECTS

InterLink: AI-Powered Recruitment Platform

Apr 2026 –

- Designed and developed a modern recruitment platform connecting students with companies, optimized by AI algorithms to match candidates with internships.
- NLP Matching Engine: Vector Embeddings via Sentence Transformers + Cosine Similarity pgvector
- RAG Assistant: Vector Retrieval + Groq llama3-8b Generation
- Modular Backend: Node.js + Express + Prisma + JWT + WebSocket
- AI Microservice: Python FastAPI + PDF/DOCX Parsing + NLP
- Frontend: React 18 + Tailwind + Zustand + shadcn/ui - Infrastructure: PostgreSQL + pgvector + Redis + Docker

Maze Solver Agent using Reinforcement Learning

Apr 2025 –

Technologies: Python, Deep Q-Network (DQN), Gym

- Engineered an intelligent agent capable of solving complex maze environments using Deep Reinforcement Learning.
- Optimized exploration-exploitation strategies to improve pathfinding efficiency and convergence speed.

Charity Management Platform

Jan 2026 –

Technologies: React, Node.js, Express, SQLite

- Developed a full-stack web application to streamline donation tracking and resource distribution for non-profit organizations.
- Designed RESTful APIs for efficient backend logic and database interactions, ensuring data integrity and real-time updates.

Dental Clinic Management System

Jan 2026 –

Technologies: Java EE, React, MySQL

- Built a comprehensive web application for managing patient appointments, medical records, and billing.
- Implemented a responsive frontend with React and a robust backend using Java EE servlets.

Image Classifier (CNN - CIFAR-10)

Oct 2025 –

Technologies: Python, TensorFlow, OpenCV

- Developed and trained a Convolutional Neural Network (CNN) for image classification on the CIFAR-10 dataset.

- Performed hyperparameter tuning and data augmentation to achieve high accuracy and model generalization.

House Price Prediction Model

Sept 2025 –

Technologies: Python, Pandas, Scikit-learn, Keras

- Built a machine learning pipeline to predict housing prices based on the California Housing Dataset.
- Conducted extensive data preprocessing, feature engineering, and model evaluation using Regression algorithms.

CERTIFICATIONS & ACTIVITIES

Certifications

- **Claude Code in Action** (March 2026): Training in AI-assisted software development and LLM-integrated coding workflows.
- **Cisco CCNA 1**: Introduction to Networks.
- **INJAZ Tunisia – Company Program** (May 2025): Participated in Junior Achievement’s entrepreneurship program, developing skills in project management, teamwork, and business simulation.

Extracurricular Activities

- **Member, IEEE – ENIT Student Branch**: Active participant in technical workshops and engineering community events.
- **Member, G2FOSS Club – ENIT**: Active participant in collaborative coding projects.
- **Competitive Programming**: Regularly solve algorithmic challenges on LeetCode to enhance problem-solving speed and logic.
